Summary

Senior Software Engineer with **3.5+ years of experience building scalable cloud-native platforms, distributed backend systems, and modern web applications on Google Cloud Platform (GCP)**. Led development of **15+ production microservices and frontend applications powering a large-scale telecom commerce platform used by millions of users**.

Experienced in **microservices architecture, Kubernetes-based deployments, infrastructure automation, and high-throughput API systems**, with strong frontend expertise in **React.js and Angular** for building responsive and scalable user interfaces.

Technologies

Backend Development: Node.js, Express.js, TypeScript, REST APIs, Microservices Architecture, Event-Driven Systems

Frontend Development: React.js, Angular.js, Redux, Tailwind CSS, HTML, CSS

Cloud & Infra: GCP (GKE, Pub/Sub, Cloud Run, IAM), Kubernetes, Docker, CI/CD

Databases: MongoDB, Redis(Caching & Streams), SQL, FireStore

Experience

Senior Software Engineer, Searce – Ahmedabad

July 2024 – Present

- **Led frontend development** of the entire telecom commerce platform using modern web technologies, designing reusable **shared component libraries** adopted across multiple internal products, significantly reducing development effort and improving code maintainability.
- **Led backend development of 15+ production microservices** for a large-scale telecom commerce platform deployed on **Google Cloud Platform (GCP)**, supporting **millions of users** and handling high-volume **asynchronous transactions across critical business workflows**.
- **Reduced manual operational effort by 80%** by automating bill management workflows using **Google Cloud Pub/Sub and Cloud Functions**, improving system reliability and operational efficiency.
- **Led production readiness and release execution** across multiple deployments, collaborating closely with **QA and product teams** to ensure smooth releases and **zero critical post-deployment issues during high-impact launches**.
- **Mentored 3–5 junior engineers** through architecture discussions, technical guidance, and code reviews, improving team productivity and increasing feature delivery speed by **40%**.

Software Engineer, Searce – Ahmedabad

Jan 2022 – July 2024

- **Developed a scalable Angular-based digital news platform** for one of India's largest media organizations, supporting **high traffic volumes and dynamic content delivery**.
- **Resolved complex L3 production issues** across large-scale commerce systems, improving platform stability and enabling **faster vendor onboarding and issue resolution**.
- Developed **database migration automation tools** that reduced **PostgreSQL migration downtime from 12 hours to 2 hours**, significantly improving reliability during production deployments.

Education

Nirma University, Ahmedabad, B.Tech – Computer Science & Engineering

Jul 2018 – Jun 2022

- CGPA: 7.6/10

Certifications

Google Cloud Professional Cloud Architect (2025)

Google Cloud Generative AI Leader (2025)

Google Cloud Associate Cloud Engineer (2024)
